About the Course

SERAM and the Spanish Radiology Foundation, together with the American Institute for Radiologic Pathology (AIRP), resumes its annual International Radiologic-Pathologic Correlation Course.

The AIRP faculty members are highly prestigious specialists with extensive professional experience and are widely recognized for their scientific excellence and teaching expertise.

The lectures cover topics of great relevance to daily clinical practice. The program offers participants the opportunity to learn and update their knowledge across a wide range of musculoskeletal, pediatric, and head and neck conditions.

As in previous editions, interactive seminars will be held alongside the lectures.

Learning Objectives

- Identify musculoskeletal, pediatric, and head and neck pathologies.
- Perform a differential diagnosis of the main musculoskeletal, pediatric, and head and neck pathologies.
- Recognize potential mimickers and diagnostic pitfalls in these three areas.
